SMOOTH SURFACE CLAY BAR REPLACEMENT

For enthusiasts who already have the Smooth Surface Clay Kit and want the convenience of purchasing just the clay bar, we offer the Smooth Surface Clay Bar Replacement. Removing above surface bonded contaminants and restoring a smooth surface to your paint finish is easily accomplished by using Meguiar's® Smooth Surface Clay Bar. Our non-abrasive clay bar safely, easily and instantly removes bonded contaminants as you rub it across the surface of your car using a mist & wipe product, like Meguiar's Quik Detailer® as a lubricant.

Part #: G-1001EU

Packaging: 1 each 50 gram bar - 6 per case

Features:

- Creates a Smooth-As-Glass surface
- Makes waxing easier & longer lasting

pH: N/A

Paintable: No

Dilution: RTU (Ready to Use)

Application Method: Mist on, rub, wipe off

Directions: For best results, prepare surface by washing with a Meguiar's carwash. Ensure vehicle surface is cool and in the shade. Mist Meguiar's Quik Detailer onto the surface for maximum lubrication, one section at a time. Rub kneaded clay bar over the lubricated surface until surface is smooth to the touch. Clay surface may reflect dark smudges – these are the contaminants that have been removed. If clay surface becomes dirty, fold and knead the clay to a clean side and continue. Wipe the surface dry with the Supreme Shine Microfiber or a 100% cotton terry cloth towel. Repeat the process around the vehicle until surfaces are smooth to the touch. For optimal results, follow with a coat of your favorite Meguiar's wax for high gloss and durability.

Health rating:

Health:	0
Fire:	0
Reactivity:	0
